

YINGJIE CHENG

Department of Astronomy
University of Washington
Box 351580
Seattle, WA 98195-1700

Postdoctoral Researcher (September 2025 - Present)
Email: yingjie@uw.edu
ORCID ID: 0000-0001-8551-071X

Education

NANJING UNIVERSITY
B.Sc. in Astronomy

Nanjing, Jiangsu, China
September 2015-June 2019

UNIVERSITY OF MASSACHUSETTS, AMHERST
Ph.D. in Astronomy

Amherst, MA, United States
September 2019-August 2025

Research Interests

Observational astronomy, Galaxy evolution, High-redshift galaxies, Interstellar dust, molecular gas

Collaborations

HST Programs

CLEAR: The CANDELS Lyman- α Emission at Reionization survey

UVCANDELS: Ultraviolet Imaging of the Cosmic Assembly Near-infrared Deep Extragalactic Legacy Survey

LaCOS: The Lyman-alpha and Continuum Origins Survey

JWST Programs

CEERS: The Cosmic Evolution Early Release Science Survey

PRIMER: Public Release IMaging for Extragalactic Research

NGDEEP: The Next Generation Deep Extragalactic Exploratory Public Survey

CAPERS: The CANDELS-Area Prism Epoch of Reionization Survey

COSMOS-Web: The JWST Cosmic Origins Survey

SPAM: Star-formation from Photometry through the Addition of Medium-bands

ALMA Programs

CHAMPS: COSMOS High-redshift ALMA-MIRI Population Survey

Research Experience

- **Transient Gamma-Ray in the Multi-Messenger Astronomy Era** **May 2017-February 2019**
Undergraduate Initial Research Project instructed by Prof. Zigao Dai at Nanjing University
- **The Diffuse X-ray Emission of Circum-galactic Medium (CGM)** **October 2017-March 2018**
Research project instructed by Prof. Jiangtao Li at University of Michigan, Ann Arbor
- **Constrain the Stellar Initial Mass Function of The Galactic Center** **May 2018-June 2019**
Summer research internship at the University of California, Berkeley instructed by Prof. Jessica Lu
- **Statistical Properties of Magnetar Bursts and FRB 121102** **March 2019-November 2019**
The undergraduate thesis project instructed by Prof. Fayin Wang at Nanjing University

- **X-ray Spectroscopy of the Starburst Feedback in 30 Doradus** **October 2019 – April 2021**
The first-year research project instructed by Prof. Daniel Wang at UMass Amherst
- **Completing the Protostar Luminosity Function in Cygnus-X** **October 2020 – February 2022**
The second-year research project instructed by Prof. Robert Gutermuth at UMass Amherst
- **Thesis Project on Studying Galaxy Evolution with JWST Data** **January 2022 – August 2025**
PhD thesis instructed by Prof. Mauro Giavalisco at UMass Amherst

School & Workshops

- The Astronomy Summer School at Shanghai Astronomical Observatory July 2017
- The Astronomy Summer Research Internship at UC Berkeley June 2018
- The NRAO/ALMA Cycle 8 community workshop March 2021
- The ngVLA Summer Short Talk Series August 2021
- The 2023 ALMA Proposal Preparation Workshop April 2023
- The PSU 2025 Summer School in Statistics for Astronomers June 2025

Invited & Contributed Talks

- An iposter talk at the Astronomy Summer Intern Symposium of UC Berkeley August 2018
- A contributed talk at the Annual Meeting of the Chinese Astronomical Society October 2018
- An invited talk at UMich Astronomy Journal Club February 2021
- An iposter talk at the 240th Meeting of the American Astronomical Society June 2022
- A contributed talk at the 2022 Northeast Star and Planet Formation Meeting July 2022
- A contributed talk at the 2023 JWST CEERS Team Meeting at UT Austin May 2023
- An invited FLASH talk at NOIRLab and Steward Observatory (University of Arizona) Jan 2024
- An invited talk at the 2024 Santa Cruz Galaxy Workshop July 2024
- A contributed talk at the Yale University Tinsley Workshop Oct 2024
- An iposter talk at the 245th Meeting of the American Astronomical Society Jan 2025
- A contributed talk at the 2025 ChOIR Conference: New Data that Challenge Underlying Assumptions in Early Galaxy Evolution July 2025
- An invited talk at the UW Astronomy colloquium Oct 2025
- An invited public talk for the UW Whole U faculty and staff program March 2026
- A contributed talk at the 2026 JWST COSMOS-Web Team Meeting at UCSB July 2026

Honors & Awards

- The Chinese National Astronomical Observatories Scholarship October 2017
- Zheng Gang Elite Scholarship November 2017
- Soochow Education Scholarship December 2017
- The title of “Outstanding Students” December 2018
- The title of “Outstanding Graduates” June 2019
- FCAD 2022 Mary Dailey Irvine graduate travel grant May 2022
- The SOFIA Science Spotlight (press release on newsletters) June 2022
- FCAD 2023 Mary Dailey Irvine graduate travel grant April 2023
- FCAD Scholars Spotlight Press Release Mar 2024
- FCAD 2024 Mary Dailey Irvine graduate travel grant May 2024
- UMass Astronomy Travel Award July 2024
- UMass Astronomy Graduate Non-Working Fellowship Jan 2025
- A press conference at the 247th Meeting of the American Astronomical Society Jan 2026

- UW news release ‘Astronomers discover ancient barred spiral galaxy’

Jan 2026

Computer Skills

Programming Languages: Python, C, C++, IDL, BASH (on Clusters)

Software: Source Extractor, Galfit, Prospector, FSPS, Starburst99, DS9, Photutils, Prismatic

Data Analysis: HST, JWST, ALMA, SOFIA, Chandra, XMM-Newton, Suzaku

Other Experiences

- Proposal Writing: HST(co-I), JWST(PI, co-I), ALMA(PI, co-I), LMT(co-I), SOFIA(co-I)
- Approved Proposals:
 - JWST Cycle 4 GO-08559 (SPAM: Star-formation from Photometry through the Addition of Medium-bands), co-I
 - LMT 2024-S1-00375 (Obscured star-formation in dense environments at $z>3.5$), co-I
 - ALMA Cycle 12-2025.1.01249.S (Dynamical and FIR Characterizations of Extremely Over-massive Dusty AGN System Discovered at $z=9.3$), co-I
 - ALMA Cycle 13-2026.1.01416.S (Dusty NIRCам F150W/F200W Dropouts), co-I
- Serving as a proposal reviewer for ALMA Cycle 11
- Serving as a proposal reviewer for ALMA Cycle 13
- Serving as an external panelist (galaxies panel) for HST Cycle 34
- 1 paper review for APJ, 1 paper review for MNRAS
- Serving as a session chair at the 2025 ChOIR Conference (July 2025)

Mentoring

- Daniel Ivanov (UMass undergrad -> UWisc-Madison grad): identifying high- z barred galaxies
- Kayla Hickey (UW undergrad): cosmic gas mass density with ALMA/Ex-MORA
- Simon Harty (UW undergrad): using machine learning techniques to identify optically thick dust

Outreach & Teaching

- | | |
|--|-----------------|
| • Giving public Astronomy lectures at Nanjing Shuren International School | September 2019 |
| • TAing for UMass Astron 100 Exploring the Universe (lecture + lab) | February 2020 |
| • Serving for the UMass Astronomy Outreach Committee | September 2020 |
| • Spring Equinox & Summer Solstice broadcast at the UMass Sunwheel | 2021-2024 |
| • Director of the FCAD summer undergraduate internship program | May-July 2022 |
| • Teaching for the UMass pre-college summer program (Modern Astronomy) | July 2022 |
| • Teaching for the UMass Eureka! Astronomy workshop for high school girls | July 2022 |
| • TAing for UMass Computational Physics course (Python coding) | September 2022 |
| • Serving for the UMass Astronomy colloquium committee (organizing lunch talks) | 2022-2024 |
| • Organizing Astro-ph coffee discussion for the UMass Astronomy department | 2023-2025 |
| • Teaching for the UMass pre-college summer program (Modern Astronomy) | July 2023 |
| • Serving as the student representative for the UMass Astronomy faculty meetings | September 2023 |
| • Teaching for the UMass pre-college summer program (Modern Astronomy) | July 2024 |
| • TAing for UMass Astron 301 Writing about Astronomy | September 2024 |
| • Organizing the Western Massachusetts Astronomy on Tap events | September 2024 |
| • ‘Astronomy is for Everyone’ stargazing event at UMass Amherst | March 2025 |
| • SED modeling workshop for undergrads at UW Astronomy | April-June 2026 |
| • Mentoring for the PENGUIN program | 2026-2027 |

Publication List

Statistics

42 published papers. 6 first-author (1 in prep), 36 co-authored

First-author citations: 89, Total citations: 2520, h-index: 25 (By 08/2026, ADS)

First-author publications
